Summary

Final-year Computer Engineering student (graduating June 2027) building full-stack web applications with React, Redux, Node.js, NestJS and PostgreSQL. Interned at Kodpit Teknoloji, where I built RESTful APIs and a React frontend and deployed them to production on Render. I use AI coding tools daily and review and test their output before shipping.

Experience

Full-Stack Developer Intern — Kodpit Teknoloji A.Ş., Denizli · Jul 2026 – Aug 2026

- Designed and built RESTful API services with NestJS, PostgreSQL and SQLite, covering user management, a comment system and relational data models.
- Co-developed the frontend of Cinemania, a movie platform, with React, Vite and the TMDB API.
- Deployed the project to production on Render and managed version control with Git/GitHub. Live: cinemania-frontend.onrender.com

Projects

- **TravelTrucks** (GoIT) — Camper rental web app with filtering, detail pages and a booking form. React, Redux Toolkit, React Router, Axios. Deployed on Render. [Live link] · [GitHub link]
- **Xsportgym website** — Promotional website designed, built and delivered to a real client (a gym in Antakya) to replace its link-in-bio page.
